Data analytics is one of the fastest-growing fields today and professionals with data analysis skills are in demand. Join us for an interactive, hands-on workshop that will give you the data analysis skills you need to get ahead in today’s job market. The workshop will:

- Lead you through the process of turning data into decisions using the R statistical software and data manipulation tools.
- Introduce you to programming, data visualization and model fitting with Python.
- Teach you how to apply the nearly limitless capabilities of R and Python to big data.
- Help you utilize statistical modeling for prediction and inference.

*Some exposure to programming is desired but not required.

This workshop is presented by the California State University, Fullerton College of Natural Sciences and Mathematics, the Center for Computational and Applied Mathematics and Big Data Discovery and Diversity — Research Education Advancement and Partnership.

Date & Time:
Saturday, November 17, 2018
R: 9:00 a.m. to 12:00 p.m.
Python: 1:00 p.m. to 4:00 p.m.

Fee:
$75 for both sessions, $50 for one session.

Location:
CSUF Irvine Center:
3 Banting, Irvine - Room 208
Parking permit is NOT required.

Register Online:

If you have any questions, please email eipconnect@fullerton.edu.

Learn R and Python on the Same Day

About the Speakers

**DR. ARJANG FAHIM**
Dr. Arjang Fahim is a post-doctoral researcher at the University of California, Irvine. He has a B.S. in computer software engineering and a Ph.D in computer science with a focus on computational biology and bioinformatics.

**DR. DWIGHT WYNNE**
Dr. Dwight Wynne is a full-time lecturer in the Department of Mathematics at California State University, Fullerton. He has an M.S. in statistics and a Ph.D in biomedical engineering. His interests include developing and using software to teach statistical thinking.

If you have any questions about this workshop, please contact us at eipconnect@fullerton.edu or call (657) 278-2611.
